Education

Philippine Christian University - Dasmariñas, Cavite
Bachelor of Science in Computer Science - **Magna Cum Laude**
THESIS: *VOTEX: A Web-Based E-Voting System with Face Recognition*

Intern Experience

ICT Technical Support Intern February 2026 – April 2026

- Troubleshoot hardware, software, and network issues
- Installed OS, drivers, and application on multiple PCs
- Set up computers and configured network
- Diagnosed internet issues (IP config, LAN, switches)
- Provide AV support (audio mixer, live camera) during events
- Documented hospital fire drill as photographer
- Managed computer lab systems (monitoring, file transfer, access control)

Projects

VOTEX: A Web-Based E-Voting System with Face Recognition (Thesis Project) PCU Dasmariñas
Lead Back-end Developer February 2025 - December 2025

- Developed a secure, scalable e-voting platform using PHP, JavaScript and Python with real-time face recognition for user verification.
- Enabled digital elections for 1,000+ students under the Student Electoral Commission with role-based access control.
- Assisted with frontend development using HTML, CSS, and Javascript.
- Implemented Google OAuth authentication.
- Developed backend functionalities using PHP.

Wix Web Development – Academic Projects
PCU Dasmariñas | May 2023

- Created and managed blog-style and information websites using Wix for academic Projects.
- Designed and organized web pages covering topics such as computer ethics.
- Customized page layouts, text, images, navigation, and other website elements to present information clearly.
- Applied basic UI/UX and responsive web design principles to improve website readability and usability.

Automatic Timetable Generator for the College of Informatics

PCU Dasmariñas | December 2024

System Developer

- Utilized Django and CSS to build a system that generated optimal class schedules based on constraints like rooms, faculty, and course load.
- Used MySQL for data storage and Python logic to resolve scheduling conflicts.
- Successfully presented the project in some professors and admin of College of Informatics.

JARVIS – Local AI Personal Assistant (Personal Project)

August 2026 – Present

Solo Developer

- Developed a Python-based voice-controlled personal assistant for hands-free desktop interaction.
- Implemented wake-word detection with openWakeWord and local text-to-speech using Piper.
- Integrated AI-powered conversational responses through the **OpenRouter API** using free-model routing.
- Implemented voice-controlled Windows automation, including application launching, closing, system locking, and screenshot capture.
- Added system monitoring capabilities for CPU, RAM, battery, date, and time.
- Implemented persistent local user memory and short-term conversational context.
- Added voice-controlled Spotify playback and Google Maps location searching.

Point of Sale (POS) System

PCU Dasmariñas | December 2023

Solo Developer

- Designed and developed a functional Point of Sale (POS) system using Java in NetBeans IDE
- Implemented features such as sales transaction processing, and automated receipt generation.
- Ensured user-friendly UI and reliable performance for daily sales operations.

Training & Certifications

- **Cisco Networking Academy** – Introduction to Cybersecurity | Issued: April 2025 | Certificate for completing Introduction to Cybersecurity
- **AWS Cloud Club** – PCU Webinar | Certificate of Participation | Held at PCU Dasmariñas – March 2025
- **AWS Cloud Club** – PCU Webinar | Certificate of Participation | Held at PCU Dasmariñas – February 2025
- **PCU Research Congress 2025** – Attendee | Philippine Christian University – Dasmariñas, Cavite
- **PCU Research Congress 2026** – Presenter | Philippine Christian University – Dasmariñas, Cavite
- **Cybersecurity Webinar** – Holy Angel University Webinar | Certificate of Participation – April 25, 2026

Skills

Technical Skills

Programming Languages:

- **Python**, **Java**, **PHP**, **HTML**, **CSS**, **JavaScript**

Web & Software Development:

- **PHP and JavaScript** – Backend development and API handling for secure web systems (e.g., e-voting system)
- **Django** – Web app development for scheduling systems and timetable generators
- **Java with NetBeans** – POS system development with local database integration and GUI handling
- **MySQL** – Relational database design and implementation across multiple systems
- **Google OAuth** – User authentication for secure login in academic systems
- **Cisco Packet Tracer** – Network simulation, LAN configuration, DNS/web server emulation

Tools & Technologies:

- **NetBeans**, **Visual Studio Code**, **XAMPP**, **phpMyAdmin**, **Git/GitHub**, **Wix, Figma** (for UI/UX)
- **AI Tools (**ChatGpt, Gemini, Claude AI, and GitHub Copilot)
- **Technical Support**
- **Network Support**
- **Google Drive/Docs** (for collaborative development and documentation)
- **Cisco Networking Academy** tools and labs
- **Microsoft Office (**Microsoft Word, Microsoft Excel, Microsoft PowerPoint, Microsoft OneNote**)**

Soft Skills

Team player, Fast learner, Analytical thinker, Problem solver, Strong communicator, can work under pressure, Detail-oriented, can visualize some problems
